

## **Synthetic grease lubricant Solidol**

Water-resistant consistent, operating/rust-preventing grease. Designed to lubricate and preserve friction, rolling and sliding units operating at temperatures ranging from  $-30^{\circ}\text{C}$  to  $+65^{\circ}\text{C}$ . May be used both for open and closed units by means of a lubricant injector.

Application temperature range: from  $-30^{\circ}\text{C}$  to  $+65^{\circ}\text{C}$
